## Trabuco Creek Rd Defencell Demonstration Project

Crews will begin a demonstration project by replacing a small portion of Trabuco Creek Road near the intersection of Trabuco Canyon Road with a geotextile material.

**WHAT:** OCPW's contractor will be replacing a 200 ft segment of Trabuco Creek Road with a geotextile material to help reduce erosion on the road. Work, in general, will include:

- **Excavation** of the current road's top layer and preparation of the native material underneath the road, which is also known as **subgrade**
- Installation of the **geotextile**, which is a permeable fabric used to separate, filter, reinforce and drain any elements that come in contact with the soil underneath the road
- Resurface the road with the appropriate materials
- Compaction of the new materials

**Note:** Work will require temporary lane closures and flaggers will be onsite to direct traffic. OCPW traffic control safety measures will be initiated to ensure the safety of all motorists, pedestrians and bicyclists.

**WHEN:** Work will begin on **July 10, 2017** and is anticipated to be completed early **August 2017**

**Work Hours:** Monday - Friday,  
7:00 A.M. to 4:00 P.M.

**WHERE:** The Project will take place on Trabuco Creek Road near the intersection of Trabuco Canyon Road. (See Map)
