

COMMUNITY UPDATE

Capistrano Surfside Inn Pedestrian Bridge Rehabilitation

OC Public Works (OCPW) continues to coordinate with local agencies on planning improvements for the Capistrano Surfside Inn Pedestrian Bridge.

? WHAT: In Summer 2016, the deteriorated existing bridge over Coast Highway was removed for emergency repairs and replaced with a traffic signal intersection for continued beach access for pedestrians. Since then, OCPW continues to work with local agencies on planning and construction for the next phase of the project. Due to the Coastal Commission construction restrictions during summer, OCPW is anticipating to begin the rehabilitation of the remaining bridge span in Fall 2017.

Note: The pedestrian bridge is currently open for public use, but will be closed during rehabilitation. The County will continue to inspect the bridge until construction begins. An additional community notice with more information regarding construction will be distributed prior to the start of the project.

📅 WHEN: **Surfside Inn Pedestrian Bridge Rehabilitation-** Tentatively Scheduled for Fall 2017

📍 WHERE: Project area is adjacent to Coast Highway between Doheny Park Road and Palisades Drive (immediately adjacent to Capistrano Surfside Inn). See map below.
